LGBT Coin

Lets make our pride go big!
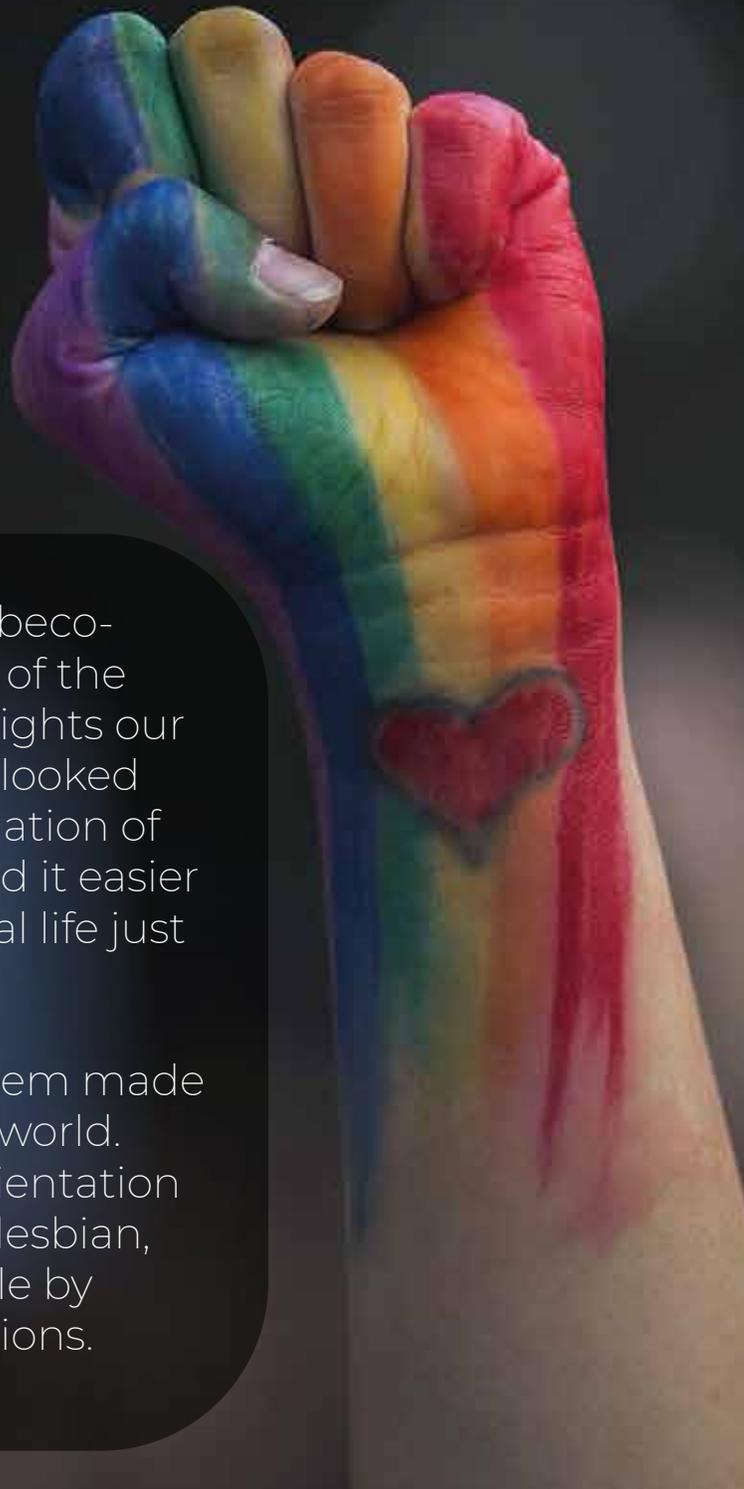

Official Whitepaper

BUY NOW!

Abstract

Now a days the LGBT community is becoming something normal in the eyes of the society thanks to all the justice and fights our past members have done, who only looked for equality and to end the discrimination of our community. Today we have found it easier to adapt to society and have a normal life just like every other heterosexual.

LGBT COIN is an all-inclusive ecosystem made for the people and dedicated to the world. Any one regardless of their sexual orientation and/or gender identity, can support lesbian, gay, bisexual, and transgender people by using our coin for their own transactions.

Intro

We are a project that seeks to end this discrimination, inequality between genders. Our vision is based on creating a united crypto community where only peace and love for cryptocurrencies matters hand in hand with the entire LGBT community.

LGBT COIN is one of our tools to seek for that equality sending a message to all those covered people that secretly belong to our community, we want to let them know that there is no need to be ashamed of what you really are, we want them all to come out of the closet and MAKE OUR PRIDE GO BIG!

NFT's

We have decided to connect our LGBT COIN to our nfts so we can have that plus in our project, in each of our nfts we want to make our community feel projected and know that all together we will make our pride go big!
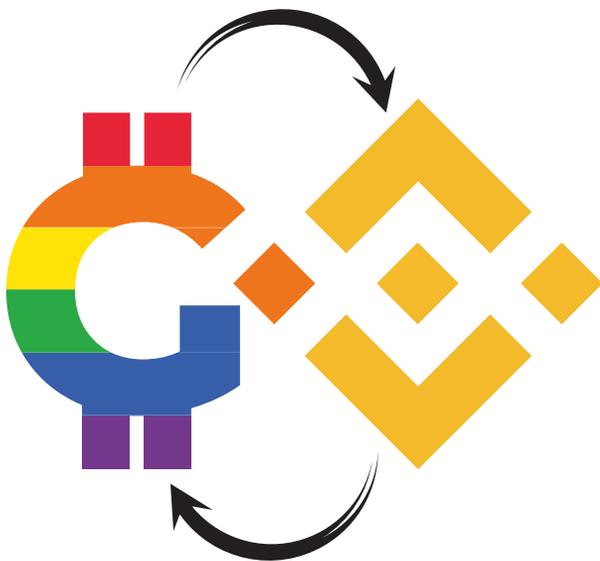

All these nfts are created by kids from our community looking to express what they feel from the bottom of their hearts.
